

With regard to 02-231, I would like to voice my objection to not being able to copy anything coming in my house for viewing via outside antenna, cable or satalite. I only want to be able to make one copy for my own consumption. I do not want wish to make copies for sale or loan to anyone. But I feel that my rights are being taken away if I am not allowed to copy/record in the same form as it arrived, i.e. High Definition. I can not always watch something at the time it is broadcast and I need the ability to record for time shifting purposes. Please do not listen soly to Hollywood as I respect their copyright issues. Allowing me and others to make a copy to watch at a different time takes not one penny out of their pocket nor does it put a penny in mine. Please do the right thing for the people.

Sincerely,  
Hugh R. F. Campbell
